COLOR CARD II

Micro SDHC/SDXC UHS-I U3

1 Card, 2 Usages, 3 Times of Speed

Team Group releases the second generation of COLOR CARD. The microSD card not only can work independently, but it can also be used with the same color SD adapter to fully serve the purpose of "1 Card, 2 Usages". With the UHS-I U3 (See Note 1) specification, the read and write speed of the COLOR CARD II is up to 90MB/s and 45MB/s respectively, that is 3 times faster than the read and write speed of a normal UHS-I U1(Class10) (See Note 1) memory card. It also supports 4K Ultra HD (See Note 2), which meets all kinds of needs in daily life including taking photos, video recording, listening music, storing precious memories, etc. "1 Card, 2 Usages, 3 Times of Speed" offers consumers multiple benefits to completely present amazing moments, and fully enjoy experiencing every second.

Minimum Sequential Write Speed

**Transmission speed will vary according to different hardware / software conditions, therefore the data can only used for basic reference.

(Note 1) The minimum sequential write speed of UHS-I U3 defined by the SD Association is 30MB/s; the minimum sequential write speed of UHS-I U1 (Class10) is 10MB/s.

(Note 2) A compatible device is required. 4K Ultra HD video (3840x2160) and Full HD video (1920x1080) support may vary based upon host device, file attributes and other factors.

Gradient design of dreamy color combinations

The COLOR CARD II from Team Group follows the exclusive design of COLOR CARD and adopts the line design of a diamond cutting surface. The design is based on colorful gradient and dreamy color combinations. The magnificent 3D visual impression with bold and creative color combinations once again completely changes consumers' traditional stereotype about memory cards, and enriches the dimensional lifestyle with mobile storage.

Storing different moments of your colorful life

With exclusive design of gradient color combinations, the COLOR CARD II is released in capacities from 16GB to 128GB. Dreamy color combinations such as Blueberry Blue, Lime Green, Peach Pink, etc. are available for consumers to choose from based on their preferences and needs, storing different moments of the colorful lives.

Impervious and perfect triple protections

The COLOR CARD II from Team Group offers complete and trustworthy triple protections: water proof, dust proof and x ray proof. The COLOR CARD II will still keep the data intact even if the shooting device is broken during the travel, offering excellent protection for your beautiful travel memories.

Preserving the planet with an eco-friendly product

The COLOR CARD II is adopting new printing technology which requires no multiple screens when printing with multi colors. During the manufacturing process, not only the color inkjet heat transfer printing is screen free, but we are also using eco-friendly inks to contribute in preserving our planet.

Main Feature

- Ultra High Speed Class 3 specification
- Supports 4K Ultra HD and Full HD video recording and playing
- Read and write speed up to 90MB and 45MB per second
- Water proof, dust proof and x ray proof
- New printing technology. Fulfill the goal of an eco-friendly product
- Lifetime warranty

Specification

Item	Specification
Model	COLOR CARD II Micro SDHC/SDXC UHS-I U3
Capacity	16 / 32 / 64 / 128GB ^[1]
Voltage	2.7V ~ 3.6V
Operation Temperature	0°C to 70°C
Storage Temperature	-40°C ~ 85°C
Data Transfer Rate	R/W : up to 90/45 MB/s ^[2]
Weight	1g
Dimensions	15.0(L) x 11.0(W) x 1.0(H) mm
Operation System	Micro SDHC <ul style="list-style-type: none"> • FAT32 format • Supports only products with the microSDHC logo or slots complying with microSDHC memory cards. • Supports only products with SDHC logo or slots complying with SDHC memory cards. (adaptor required) Micro SDXC <ul style="list-style-type: none"> • exFAT format • Supports only products with the Micro SDXC logo or slots complying with Micro SDXC memory cards. • Supports only products with SDXC logo or slots complying with SDXC memory cards. (adaptor required)
Write protect	Micro SD (No) Micro SD to SD Adapter (Yes)
Warranty	Lifetime warranty

[1] Part of the capacity of FLASH storage products will be used for formatting or other functions, and the displayed capacity in the operating system will be less than the actual storage capacity due to unit conversion. It is recommended to calculate the actual storage capacity based on this equation: total bytes/1024/1024/1024.

[2] Transmission speed will vary according to different hardware / software conditions, therefore the data can only used for basic reference.
